NOTES

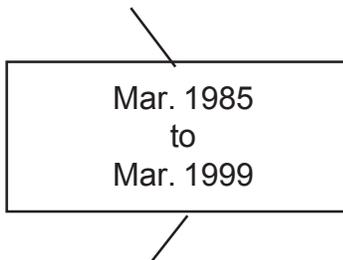

(This Page Left Blank for Notes)

AG15-IV Flex Wing Rotary ARCHIVE BOOK INTRODUCTION

The AG15-IV Archive Book is a complete listing of Parts from the first Unit to the Present. The Production Dates, Serial Numbers, Special Notes and Descriptions are furnished to help find Replacement Parts. Dimension (if listed) are for Identification of Parts and MAY NOT be to Manufacturing Specification, Your measurements may vary some from dimensions listed. Some Parts may be changed and be different than parts listed. Some Modification may be required when replacing older parts. Match S/N's listed in the rear of this Book with the Ship Dates listed at the top of each Parts Page. This is because of the wide range of Model sizes using these S/N's, Note: in 1987 there was a S/N order Change from 5 digits to 4 digits, Production on this model ended March 2002

For ordering parts, following instructions are offered to help eliminate delay

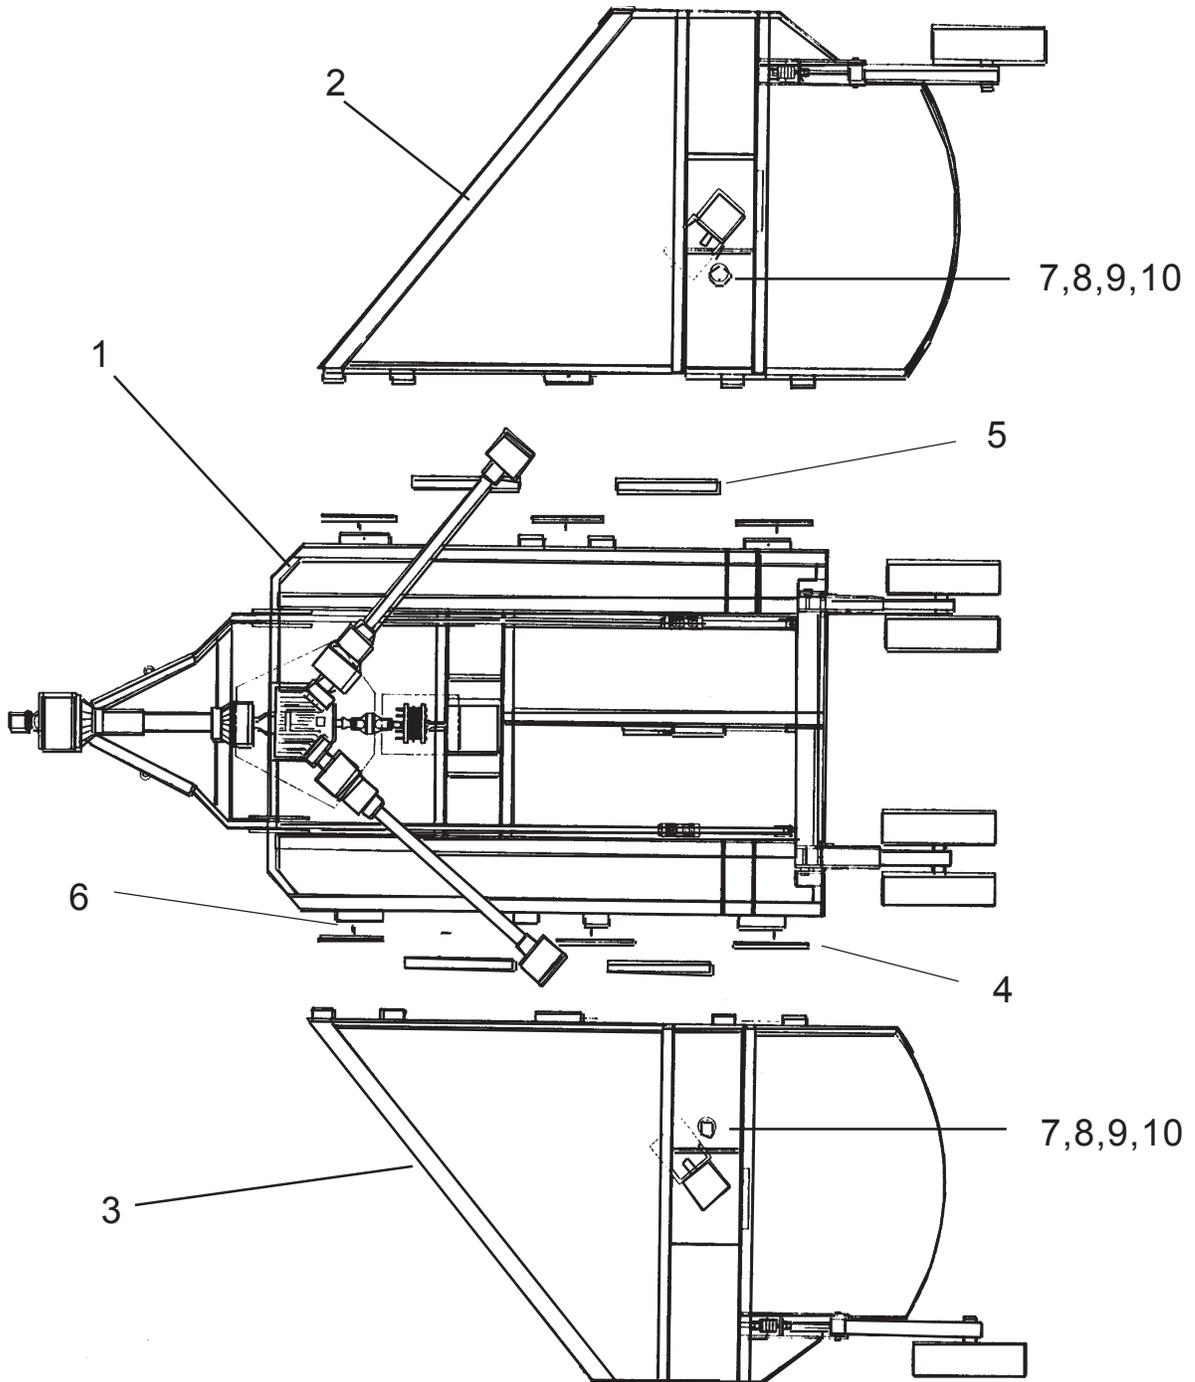

1. The purchase order must include the Name, Address (Ship to Street Address) of the Person / Organization ordering the parts. Who / How Parts should be Billed. Name and Phone Number of a Contact Person at your end.
2. The Purchase Order must list clearly the correct Part Number of Part. Quantity of each Part wanted, Complete and correct Description of each Part. All Parts will be shipped as requested depending on availability and/or reasonability of request carrier / method.
3. Alamo Industrial reserves the right to substitute parts where applicable and change prices Without prior notice. Alamo Industrial also reserves the right to Ship Parts the most Reasonable way as determined by Alamo Industrial.
4. Some Parts are unlisted items, which are special production items not normally stocked or built for a limited / special use, These parts may be subject to special handling or cannot be priced till ordered. Always Request a quotation for such Parts before sending a purchase order.

HYD & HOSE CIRCUIT (STANDARD SYSTEM)

S/N 15-42840
to
S/N 15-Current

NOTE:

The Three Spool Control Valve must have "Detented Float Positions" for the Two Wing Cylinder Spools. If such a valve is not used, excessive stress will be induced into the deck because it can not float.

This example may or may not show the connections for your valve - The "Detented" valve Handles should Supply the wings.

Used
03-85 (S/N 15-42840)
to

WHEEL AND TIRE ASY

S/N 15-42840
to
S/N 15-Current

Used
03-85 (S/N 15-42840)
to
(END PRODUCTION)

Place Conical Side of Lugnut
against Wheel

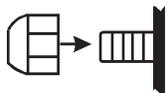

See Side of Tire for
Maximum Pressure

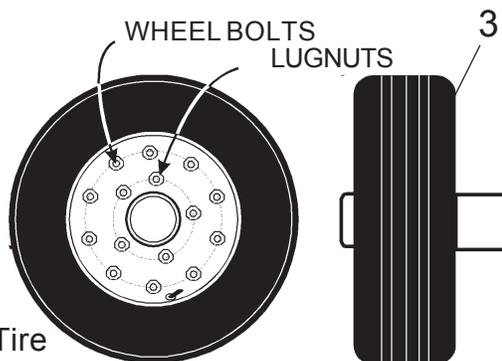

Ribbed Implement Tire & Wheel

Install Flat Side of Lug Nut
Against Wheel as Shown

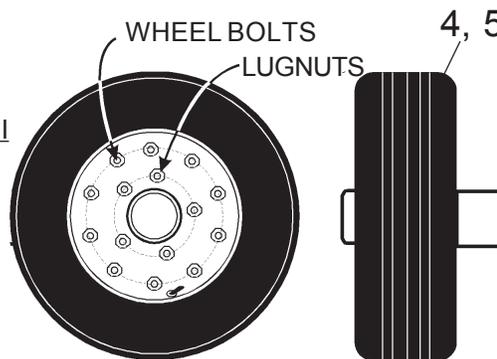

No Air Used in these
tires & wheels

Laminated Tire or Foam Filled Tire

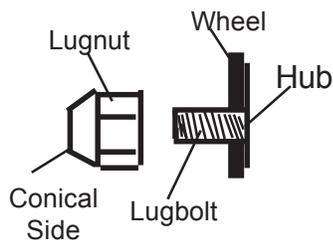

Maximum Inflation Pressure 50 PSI
Also See Decal # 00762608
**(DO NOT remove wheel bolts
while tire is inflated !)**

Airplane Tire & Wheel

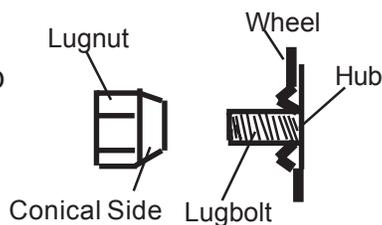

LUGNUT MUST be mounted correctly according to Wheel Design

Figure 1

If Flat Sided Hole

Figure 2

If Cone Sided Hole

NOTE: It is VERY IMPORTANT on some types of Tires and Wheels how they are mounted, the direction of travel, the Air Pressure, the way they bolt together, the way the Lug Nuts are installed and/or other special features that may be special only to that tire and wheel. ALWAYS check for any special instructions for the type Tire and Wheel being used before ordering or installing any Wheels or Wheel components.
